

**Assignment 4: E.S. 34 II, III**

**34 II** Put these equations in functional form:

a.  $2x + y = 3$

b.  $2x - 3y = 6$

c.  $5x - 7y + 2 = 3x + y - 1$

d.  $ax + by = c$

**34 III** Put these equations in standard form:

a.  $y = 2x + 7$

b.  $y = \frac{1}{2}x - 3$

c.  $y = \frac{3x-7}{5}$

d.  $y - 6x - 5 = 3y + 3$
