

Math 307F · Winter 2013

Contact Info ▷ Peter Caday (pcaday@uw.edu)
Office: Padelford C-34

Class Website ▷ <http://www.math.washington.edu/~pcaday/307/>. The class website will contain important announcements, study material, and homework assignments. It's important for you to check it regularly. I will also send information by email to the class.

Textbook ▷ *Elementary Differential Equations and Boundary Value Problems*, 9th edition, by William E. Boyce.

Office Hours ▷ Office hours will be determined by the end of the first week. There is an survey online (linked from the course website) where you can indicate what times work best for you.

→ *Since we don't have quiz sections in 307, office hours are your time to get one-on-one help with the material.*

Help with 307 ▷ Whether you have questions on homework or lecture, or find yourself struggling with the class, don't be afraid to ask for help. You can email me, come by office hours, or make an appointment.

You can also get one-on-one tutoring at CLUE (<http://depts.washington.edu/clue>).

Homework ▷ We will have around 7 homework assignments this quarter, which will be posted on the class website. You may work on the homework with other Math 307 students, but you must write up your solutions separately. Homework assignments will normally be turned in during class.

→ *Always show your work! Without proper work shown, you may not receive credit, even if you have the correct answer.*

Homework will usually be due in class. If you are unable to attend class, you can have a friend turn your homework in, or you can scan and email it to me before 12:30. You are allowed to turn in one homework assignment up to one week late (except for the final homework), although 10% will be deducted from that homework's score. After the first late homework, I will look over your work, but you won't receive any credit for it.

Quizzes ▷ There will be 6–7 short quizzes in class. Quizzes are meant to check whether you have a basic understanding of the material from that week. Topics for each quiz will be announced a few days ahead of time.

Exams ▷ We will have two midterms (dates to be announced soon) and a cumulative final, in the regular classroom. Following the standard UW time schedule, the final will be Thursday, March 21, 8:30–10:20.

Grade Breakdown ▷	Quizzes	10%
	Homework	15%
	Midterm 1	20%
	Midterm 2	20%
	Final	35%

If your final grade is 60%, you will earn at least a 2.0, and if your final grade is 95% or above, you will earn a 4.0.

Other Information ▷ If you have special circumstances, such as a disability, which require accommodation, let me know, and I would be glad to help.
